Summary

Backend-focused Software Engineer with 4+ years of experience designing and shipping scalable, multi-tenant Web APIs. Proven track record in .NET Core, PostgreSQL, and AWS cloud integration across real estate and fleet management sectors. Combines a strong analytical background in Energy Systems with technical expertise to deliver production-grade, end-to-end software solutions.

Skills

- C#
- SQL
- .NET Core
- ASP.NET Web API
- Entity Framework Core
- Generative AI Foundations & Prompt Engineering Fundamentals (Beginner)
- PostgreSQL
- AWS S3
- AWS Elastic Beanstalk
- Cloudflare
- Quartz.NET
- Git
- Postman
- Typescript
- Blazor
- .NET MAUI

Experience

Software Developer · DataSpeaks Services Pvt. Ltd.

May 2021 - Jul 2025 · Hyderabad, India

- Architected and maintained multi-tenant RESTful Web APIs using ASP.NET Core and Entity Framework Core.
- Designed complex PostgreSQL schema and Entity Relationship Diagrams to ensure data consistency and high-performance scaling.
- Conducted performance tuning on PostgreSQL query execution plans to optimize response times for high-frequency data endpoints.
- Integrated AWS S3 and Cloudflare Image Services to reduce image load latency and decouple storage from core application logic.
- Implemented ASP.NET Identity-based authentication and role-based access control to secure multi-client microservice deployments.
- Developed a real-time GPS/OBD data ingestion service to persist vehicle telemetry into PostgreSQL.
- Automated scheduled vehicle-tracking reports via Quartz.NET to streamline client data delivery.
- Managed end-to-end deployments on AWS Elastic Beanstalk, coordinating release scopes and delivery timelines.

Education

M.Tech in Energy Systems (Mechanical Engineering) · JNTU, Hyderabad

Projects

StageXPS - Multi-Tenant Real Estate CRM Platform

Lead Developer

- Designed and built a full-scale real estate platform covering CRM, finance, and invoicing.
- Modeled 15+ entities via Visual Paradigm ERDs to implement complex foreign-key relationships for multi-tenant isolation.
- Integrated AWS S3 and Cloudflare to optimize document and media handling.

Archd - Inventory & Warehouse Management System

Developer

- Built inventory and staging management features for RFID-tagged products to enable real-time tracking.
- Implemented role-based access control via ASP.NET Identity to strengthen data security for warehouse operations.

Fleet Management System - GPS/OBD Telemetry Service

Developer

- Developed a real-time ingestion service to parse and decode hexadecimal GPS/OBD packets.
- Built an automated Quartz.NET pipeline to retrieve and email historical vehicle data.

Alumni Social Media App

Developer

- Built a cross-platform .NET MAUI iOS/Android app featuring registration, news feeds, and geolocation proximity services.

VoD Meter Desktop Application

Developer

- Developed a Blazor desktop application using .NET SerialPort API to read and export live data from detonation meters.

Notable Achievements

- Architected multi-tenant RESTful Web APIs supporting diverse production systems in real estate and fleet management.
- Engineered a real-time GPS/OBD data ingestion service, successfully decoding proprietary hexadecimal packets into structured telemetry.
- Automated complex reporting pipelines using Quartz.NET, significantly reducing manual administrative effort for clients.

Certifications

GenAI Masterminds – Generative AI Foundations & Prompt Engineering

Outskill | July 2026

Skills Covered:

Generative AI • Prompt Engineering • Large Language Models (LLMs) • Artificial Intelligence
• Transformer Architecture • Tokenization • Embeddings • AI Productivity • Context Engineering
